---

Hopefully TCEQ and TDSHS will advise the City to develop a plan to address the asbestos issues during or prior to demolition. TDSHS recommendation was to that extent.

From a debris management perspective this looks good other than there is no mention of NESHAPS for structures that cannot be assessed for ACM. Do you know if they are talking about putting a plan together for air sampling for asbestos in the neighborhoods?

Spoke with Jason Neumann, TCEQ acting On-Scene Coordinator (254-366-3942).

He directed me to the TCEQ website and the debris management plan which has been presented to the City of West. They have identified numerous landfills as well as considering opening a previously closed one to begin disposal operations. They will accept and are allowing segregated debris, household hazardous waste, animal carcasses, demolition (C/D) debris. See link for more details.
